(54) Title: MODIFICATION OF POLYSACCHARIDE CONTAINING MATERIALS

(57) Abstract: Compositions for cross-linking and/or modifying the properties of polysaccharide containing materials are provided. Methods for cross-linking polysaccharide containing materials include the step of treating polysaccharide structures with a PBD fusion protein. Properties of polysaccharide containing materials can be functionalized by treatment with PBD fusion proteins comprising a functional moiety. Polysaccharide containing materials such as paper and textiles with increased wet strengths and/or elasticity are described.

Applicant CBD TECHNOLOGIES LTD.		
1. X The applicant is hereby notified that the international	search report has been established and is transmitted herewith.	
Filing of amendments and statement under Article		
When? The time limit for filing such amendme	ents is normally 2 months from the date of transmittal of the more details, see the notes on the accompanying sheet.	
Where? Directly to the International Bureau of WIPO 34, chemin des Colombettes 1211 Geneva 20, Switzerland		
Facsimile No.: (41-22) 740.14.35 For more detailed instructions, see the notes on the accompanying sheet.		
2. The applicant is hereby notified that no international search report will be established and that the declaration under Article 17(2)(a) to that effect is transmitted herewith.		
3. With regard to the protest against payment of (an) additional fee(s) under Rule 40.2, the applicant is notified that:		
the protest together with the decision thereon has been transmitted to the International Bureau together with the applicant's request to forward the texts of both the protest and the decision thereon to the designated Offices.		
no decision has been made yet on the protest; the applicant will be notified as soon as a decision is made.		
4. Further action(s): The applicant is reminded of the following:		
Shortly after 18 months from the priority date, the international application will be published by the International Bureau. If the applicant wishes to avoid or postpone publication, a notice of withdrawal of the international application, or of the priority claim, must reach the International Bureau as provided in rules 90 bis 1 and 90 bis 3, respectively, before the completion of the technical preparations for international publication.		
Within 19 months from the priority date, a demand for international preliminary examination must be filed if the applicant wishes to postpone the entry into the national phase until 30 months from the priority date (in some Offices even later).		
Within 20 months from the priority date, the applicant mu before all designated Offices which have not been elected priority date or could not be elected because they are n	ast perform the prescribed acts for entry into the national phase d in the demand or in a later election within 19 months from the ot bound by Chapter II.

INTERNATIONAL SEARCH REPORT

International application No. PCT/IL00/00708

BOX II. OBSERVATIONS WHERE UNITY OF INVENTION WAS LACKING This ISA found multiple inventions as follows:

This application contains the following inventions or groups of inventions which are not so linked as to form a single inventive concept under PCI Rule 13.1. In order for all inventions to be searched, the appropriate additional search fees must be paid.

Group I, claim(s) 1-49 and 105, drawn to a process of manufacturing a generic polysaccharide-containing material (PCM) comprising contacting the polysaccharide structures of the PCM with a generic composition containing a polysaccharide binding domain (PCD)

Group II, claim(s) 50-102, drawn to a composition-of-matter comprising a generic PCM and a generic composition containing a PBD with the PBD being bound to the polysaccharide structures of the PCM.

Group III, claim(s) 103 and 104, drawn to a nucleic acid construct comprising a polynucleotide encoding a fusion protein including at least two PBDs.

The inventions listed as Groups I, II, and III do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: There is no novel, common technical feature contributed by the applicant that links the three groups. All the groups contain some component with one or more polysaccharide binding domains. Although group II is a nucleic acid construct encoding a fusion protein including two polysaccharide binding domains, groups I and II a recite unspecified polysaccharide binding domain(s). Compositions comprising polysaccharide binding domains are known in the art and therefore not novel. See, for example, Kilburn et al (US 5,137,819).
